CAREER OBJECTIVE

BBA (HR) graduate currently pursuing Data Science with AI, with foundational knowledge in Python, SQL, Machine Learning, Deep Learning, and Data Visualization. Passionate about learning emerging AI technologies and building innovative solutions through continuous skill development. Seeking an opportunity to apply analytical and technical skills while gaining practical industry experience and growing professionally in the field of Artificial Intelligence and Data Science.

EDUCATION

Shri B.J. Patel Umiya College, Ahmedabad	2022 – 2025
BBA / HR	Ahmedabad
Beachelor of Business Administration	
Tops Technologies, Ahmedabad	Ahmedabad
DATA SCIENCE WITH AI	
ONGOING	

TECHNICAL SKILLS

- **Programming Language:** Python | SQL | No SQL
- **Web Development:** HTML
- **Data Base:** MY SQL | MongoDB
- **Python Package and frame Work:** Scikit-Learn | Tensorflow | Keras | Numpy | Scipy | Seaborn | Matplotlib | Pytorch
- **Core Concepts:** Data Science | Machine Learning | Deep Learning

SOFT SKILLS

Teamwork	Time Management
Active Listening	Analytical Thinking
Leadership	

FEATURED PROJECTS

ATM Management System Using Python

Tech Stack: Python

- Developed an ATM Management System with balance inquiry, cash withdrawal, deposit, and PIN authentication features.
- Implemented menu-driven banking operations using Python functions, loops, and conditional statements.
- Applied modular programming and exception handling to simulate real-world ATM transactions.

Student Placement Prediction Using Machine Learning

Tech Stack: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, google colab

- Developed an end-to-end Machine Learning classification model to predict student placement status (Placed / Not Placed) using academic and skill-based data.
- Performed data pre-processing, missing value handling, feature encoding, and exploratory data analysis (EDA) using Pandas, NumPy, Matplotlib, and Seaborn.
- Implemented Train-Test Split, Scikit-learn Pipelines, and feature transformation techniques for efficient model training.
- Built and evaluated multiple classification algorithms including Logistic Regression, Decision Tree, Random Forest, KNN, and SVM.
- Compared model performance using Accuracy Score, Precision, Recall, F1-Score, and Confusion Matrix to identify the best-performing model.
- Applied Machine Learning best practices for preprocessing, model evaluation, and classification workflow automation.
